Report & Retire

Auto-generate your EU ETS compliance report. Retire credits directly from your dashboard. One-click export for regulatory submission to EU and national authorities.

AUTOMATED · AUDIT-READY

SELLERS

List your credits.
Reach the world.

Whether you're a biofuel producer, a land conservation program, or a carbon project developer — UAIU.LIVE/X connects you directly to institutional buyers who need your credits right now.

⚡

List in 48 Hours

Submit your project documentation, receive verification, go live. Fastest onboarding in the carbon market — faster than Verra, faster than Gold Standard direct.

`Required: Project docs · Registry serial numbers · Vintage year`

💰

0% Listing Fee

Free to list. We charge 0.75% on successful transactions only. No upfront costs, no subscription, no hidden fees. You keep 99.25% of every sale.

`Success-only commission · Wire or crypto settlement`

🌊

Caribbean Premium Pricing

Caribbean-origin credits command a premium on UAIU.LIVE/X — buyers specifically seeking island-nation and indigenous land program credits pay above EU ETS spot.

`SwissX B100 credits average 13% above EU ETS spot`

Blockchain Provenance

Every listed credit gets an immutable blockchain record linking it to its originating project. Eliminates double-counting risk and gives buyers full confidence.

Integrated with major registries · Auto retirement tracking

HOW IT WORKS

Waste becomes *wealth.*

Communities in Carbon Union nations participate in verified environmental programs — turning agricultural waste, human waste, degraded land, and CO_2-averting activity into measurable climate assets that trade on global markets.

Join a Green Project

Register via the Citizens Portal. Choose from local programs: biofuel production, coral restoration, reforestation, agricultural waste conversion, or regenerative soil building.

Earn Verified Credits

Your participation is measured against recognized carbon standards. Every tonne of CO_2 averted

Citizens Portal

Backed by SwissX Sovereign Wealth Fund · Carbon Union Nations

WHAT GENERATES CREDITS

🌊

Sargassum Seaweed

Harvested from Caribbean beaches, converted into SwissX B100 biofuel. 93% lower emissions than diesel.

`1 credit per 90 gallons produced`

🌿

Agricultural Waste

Crop residues, manure, and organic waste converted to biogas and regenerative soil products across Kenya and Zambia.

`Measured per tonne $CO_2$ averted`

🪸

Coral & Seagrass

28M+ acre restoration initiative across Pacific and Caribbean. Blue carbon sequestration verified by VCS standard.

`Sequestration measured annually`

🏘️

Green Economy Zones

Communities like East Altadena, CA rebuild using regenerative materials. The rebuilding itself generates credits that fund further recovery.

`Self-financing community model`

💧

Human Waste Systems

Biodigester programs convert human and municipal waste into clean energy and fertilizer, eliminating methane emissions.

`Methane avoidance credits issued`

🌳

REDD++ Forestry

Verified forest conservation and reforestation programs in Honduras, Zambia, and Antigua generating Gold Standard credits.

`Gold Standard certified`

KARMIC ECON

Every act of environmental repair

becomes a *financial asset.*

The SwissX Sovereign Wealth Fund underwrites environmental and regenerative energy projects built on sustainability — transforming natural waste into measurable climate assets that flow back to the communities that created them.

Built for the EU ETS mandate era

⚖️

From 2025, EU shipping companies must surrender allowances for 70% of their emissions. By 2027, it's 100%. Every tonne of CO_2 not covered by a credit costs €100 in fines — nearly double the credit price. UAIU.LIVE/X exists to close that gap, cleanly, quickly, and with full regulatory documentation your compliance team can submit directly to national authorities.

FROM OUR CLIENTS

Why institutions *choose UAIU.*

★★★★★

"We needed EU ETS-compliant credits for our Caribbean routing fleet. UAIU.LIVE/X had verified inventory, competitive pricing, and our compliance team had the documentation they needed in under 24 hours."

Head of Sustainability

Major Caribbean Cruise Operator

★★★★★

"Listing our REDD++ forest conservation credits on UAIU took 48 hours. Within a week we had three institutional buyers. The Caribbean origin premium is real — we're selling at 11% above what we'd get on other platforms."

Director of Carbon Programs

Caribbean Conservation Trust

★★★★★

"The compliance calculator alone was worth the call. We didn't realize how much EU ETS exposure our Caribbean routes were generating. UAIU showed us the number and had a solution ready in the same conversation."
